

PERSONALIZED CURRICULUM ROADMAP

Exness Trading Mastery Program

6-Month Foundational Curriculum

Document Version	1.0
Prepared For	Beginner Retail Trader (Bangladesh Resident)
Primary Broker	Exness
Program Duration	6 Months (Foundation) — Extendable
Document Date	2026-08-19
Governing Principle	Survival → Consistency → Scale

CONFIDENTIAL — PERSONAL USE ONLY

EXECUTIVE SUMMARY

This document defines your complete 6-month personalized trading curriculum. It is built around one core principle: **survival first, consistency second, scale only after evidence**. The curriculum progresses through three phases — Foundations, Strategy Development, and Demo Execution — before any live capital is committed. Each phase has explicit graduation criteria. No phase is skipped. No shortcuts are taken.

You will not be permitted to trade live money until you demonstrate competency across knowledge, risk management, technical analysis, strategy execution, statistics, psychology, discipline, and execution.

PART I — TRADER PROFILE & OPERATING CONSTRAINTS

1.1 Trader Profile

Attribute	Value	Implication for Curriculum
Current Knowledge	Absolute beginner	Start at Module 0; assume zero prior knowledge
Technology Skills	High (9/10)	Can use spreadsheets, possibly coding — leverage for automation
Platform Experience	None	Full Exness/MT4/MT5 walkthrough required
Available Study Time	~14 hours/week	Plan 6-8 hrs theory + 6-8 hrs practice weekly
Intended Live Capital	BDT 100,000 (~\$830 USD)	Conservative position sizing, micro-lot priority
Financial Situation	High liability, distress risk	Capital protection framework is non-negotiable
Target Return Expectation	Was 300% monthly (revised)	Reset to realistic expectancy-based objective
Regulatory Status	Bangladesh — grey area	Live trading gated by legal consultation

1.2 Operating Constraints (HARD RULES)

These constraints govern every decision throughout the program:

#	Constraint	Reason
1	Maximum 0.5% account risk per trade (early stages)	Survival first
2	Maximum 2% daily loss — trading stops if reached	Prevent revenge trading
3	Maximum 6% weekly loss — week paused if reached	Capital protection
4	Maximum 10% monthly drawdown — strategy review	Trigger for reassessment
5	No martingale, no grid, no averaging down	Known statistical ruin
6	No trade during major news (first 90 days)	Avoid uncontrolled volatility
7	Maximum 2 simultaneous open positions	Prevent concentration risk
8	No increase in position size after losses	Prevent revenge sizing
9	Demo trading minimum 60 days before live	Skill validation
10	Bangladesh legal consultation required	Regulatory awareness

PART II — REVISED PROFESSIONAL OBJECTIVE

2.1 Primary Objective

Build a documented, equipped, evidence-based trading process that protects capital as the highest priority, develops statistical edge through systematic validation, and grows account equity only after sustained evidence of positive expectancy.

2.2 Measurable Targets

Metric	Target (Foundation Phase)	Stretch (After 1 Year)
Monthly account drawdown	≤ 6%	≤ 4%
Risk per trade	0.5% (months 1-3), 0.75% (months 4-6)	1% (after proven edge)
Win rate expectation	Whatever system delivers, ≥ 40%	Strategy-dependent
Risk/Reward minimum	1:1.5	1:2
Strategy compliance	100% rule-following	100% rule-following
Maximum losing streak	10 consecutive losses	Strategy-defined
Annual return target	Skill building, NOT monetary	Realistic 10-25% annual

2.3 Explicitly Rejected Goals

The following are NOT objectives of this program:

- Monthly income from trading in Year 1
- Replacement of primary income source
- Getting rich quickly
- Using high leverage to magnify small capital
- Following external signals or "gurus"
- Achieving 100% win rate
- Beating institutional traders through speed or capital

PART III — CURRICULUM DESIGN PRINCIPLES

3.1 Pedagogical Structure

The curriculum follows the **Show–Do–Test–Apply** cycle:

**LEARN (theory) → OBSERVE (charts) → PRACTICE (paper/exercises) → TEST (quiz) →
DEMO (apply) → REVIEW (analyze) → ADVANCE**

You do not advance to the next module until you demonstrate competency in the current one.

3.2 Time Allocation Per Week

Activity	Hours	% of Week
Theory (read/watch)	4-5	~33%
Chart observation (no trading)	3-4	~25%
Practical exercises / calculations	3-4	~25%

Activity	Hours	% of Week
Review and journaling	1-2	~17%

3.3 Daily Session Structure (2-hour weekday)

Block	Duration	Activity
Theory	40 min	Read / watch lesson content
Observation	30 min	Study charts, identify patterns
Exercise	30 min	Calculations, quizzes, scenarios
Reflection	20 min	Update journal, notes, questions

3.4 Weekend Full-Day Structure (Sat + Sun)

Day	Focus
Saturday (6 hrs)	Deep theory + chart observation + backtesting work
Sunday (6 hrs)	Practice exercises + weekly review + quiz preparation

PART IV — PHASE 1: FOUNDATIONS (Months 1-2)

Phase Goal: Establish deep conceptual understanding of markets, Exness broker mechanics, and the trading vocabulary. Build foundational risk-management skills.

Parameter	Specification
Phase Duration	8 weeks
Total Hours	~110 hours
Critical Deliverables	Risk engine spreadsheet, complete glossary, market observation log

MONTH 1 — MARKET REALITY & BROKER MECHANICS

WEEK 1 — Financial Market Reality

Learning Objectives:

- Understand what financial markets are and why prices move
- Identify market participants and their roles
- Understand how brokers earn and the broker-trader relationship
- Recognize why most retail traders lose

Daily Breakdown:

Day	Topic	Practical Task
Mon	What financial markets are	Open Exness demo account; observe prices
Tue	Why prices move (supply/demand)	Watch 3 instruments for 2 hours; record price changes
Wed	Market participants	Identify 1 news event impact on price
Thu	How brokers earn money	Read Exness fee schedule; identify spreads
Fri	Why 70%+ retail traders lose	Quiz + reflection
Sat	Deep study + market observation session	Chart observation: 6 hours
Sun	Weekly review + journal setup	Create first journal entries

Week 1 Deliverables:

- Exness demo account opened
- First journal entry created
- Quiz on Module 1.1 passed ($\geq 80\%$)
- Market observation log started (5 instruments $\times$ 1 hour)

WEEK 2 — Forex Fundamentals

Learning Objectives:

- Understand currency pairs (base/quote)
- Distinguish majors, minors, exotics
- Define pip, pipette, lot, contract size
- Calculate pip value across pairs

Daily Breakdown:

Day	Topic	Practical Task
Mon	Currency pairs structure	Identify 10 major pairs on Exness
Tue	Majors vs minors vs exotics	Categorize 20 Exness pairs

Day	Topic	Practical Task
Wed	Pip & pipette math	Calculate pip values for 5 pairs
Thu	Lot sizes & contract sizes	Position sizing exercise (no risk yet)
Fri	Bid/ask/spread mechanics	Spread observation on 3 pairs
Sat	Deep chart study: EUR/USD, GBP/USD, USD/JPY	Record 1-hour price action
Sun	Weekly quiz + review	Pass pip calculation test

Week 2 Deliverables:

- Pip calculation quiz: $\geq 90\%$ accuracy
- Lot size scenarios completed (10 problems)
- Pip value spreadsheet template created
- 20 currency pairs categorized correctly

WEEK 3 — Broker Mechanics: Margin, Leverage, Lot Calculations

- Understand margin, free margin, margin level
- Calculate margin requirements
- Distinguish available vs effective leverage
- Build position-sizing formulas

Daily Breakdown:

Day	Topic	Practical Task
Mon	Margin mechanics	Calculate margin for 1 lot on 3 pairs
Tue	Leverage math (1:1 to 1:2000)	Solve 15 leverage problems
Wed	Margin call vs stop-out	Simulate margin level scenarios
Thu	Margin level formula	Build margin calculator in Excel
Fri	Position sizing fundamentals	Solve 20 sizing scenarios
Sat	Risk engine spreadsheet construction (Part 1)	Build calculator template
Sun	Spreadsheet testing + quiz	Verify formulas

Week 3 Deliverables:

- Risk Engine Spreadsheet v0.1 (margin + position sizing)
- 30 leverage calculation problems solved correctly
- 10 margin call scenarios analyzed
- Quiz: $\geq 85\%$

WEEK 4 — Trading Costs: Spread, Commission, Swap, Slippage

- Calculate total cost of a trade
- Understand spread variability
- Distinguish swap-free vs swap accounts
- Recognize slippage scenarios

Daily Breakdown:

Day	Topic	Practical Task
Mon	Spread analysis	Compare spreads across 5 Exness account types
Tue	Commission structures	Calculate commission cost per trade (Raw/Zero)

Day	Topic	Practical Task
Wed	Swap / rollover mechanics	Read Exness swap rate table; compute holding cost
Thu	Slippage causes & prevention	Simulate 5 execution scenarios
Fri	Total cost of a trade	Cost calculation scenarios (10 problems)
Sat	Risk engine spreadsheet v0.2 (add cost fields)	Add spread cost to calculator
Sun	Cost comparison test + journal	Pass cost calculation quiz

Week 4 Deliverables:

- Risk Engine Spreadsheet v0.2
- Cost comparison table (Standard vs Pro vs Raw vs Zero)
- 20 cost scenarios solved
- Quiz: $\geq 85\%$

MONTH 2 — TECHNICAL ANALYSIS FOUNDATION

WEEK 5 — Price Charts & Timeframes

- Read candlestick charts
- Identify bullish vs bearish candles
- Choose appropriate timeframes
- Distinguish timeframes (M1 to MN)

Day	Topic	Practical Task
Mon	Chart types: line, bar, candlestick	Identify 50 candles as bullish/bearish
Tue	Candlestick anatomy (OHLC)	Mark OHLC on 30 candles
Wed	Timeframe hierarchy (M15, H1, H4, D1, W1)	Compare same instrument on 5 TFs
Thu	Higher TF vs lower TF behavior	Identify which TF shows current trend
Fri	Choosing appropriate TF	Quiz: when to use H1 vs H4
Sat	Chart observation marathon (6 hours)	Record 30 chart observations
Sun	Journal review + quiz	Pass TF selection scenarios

Week 5 Deliverables:

- 100 candles classified (bullish/bearish)
- 30 chart observation entries
- Timeframe selection quiz: $\geq 90\%$
- Identify current trend on 3 pairs across timeframes

WEEK 6 — Support, Resistance, Trend

- Identify support and resistance zones
- Distinguish trend vs range
- Recognize swing highs and swing lows
- Apply market structure basics

Day	Topic	Practical Task
Mon	Support & resistance definition	Mark S/R on 10 charts
Tue	Identifying S/R on multiple timeframes	Multi-TF analysis on 5 pairs

Day	Topic	Practical Task
Wed	Trend definition & types	Identify trend on 10 charts
Thu	Range vs trend identification	Classify 15 charts
Fri	Swing highs/lows (HH, HL, LH, LL)	Mark structure on 10 charts
Sat	Chart study: 6 hours	20 structure observations
Sun	Market structure quiz + journal	Pass structure identification test

Week 6 Deliverables:

- 25 chart structure identifications recorded
- S/R zones marked on 10 charts
- Quiz: $\geq 85\%$
- Multi-timeframe analysis example completed

WEEK 7 — Indicators Introduction

- Understand what indicators do
- Distinguish trend vs oscillator indicators
- Recognize limitations of indicators
- Avoid indicator overload

Day	Topic	Practical Task
Mon	What indicators are (and aren't)	Compare 5 indicator types
Tue	Moving Averages (SMA, EMA)	Identify crossovers on 10 charts
Wed	RSI (Relative Strength Index)	Identify overbought/oversold on 15 charts
Thu	MACD basics	Identify MACD signals on 10 charts
Fri	ATR (Average True Range)	Calculate ATR manually on 5 days
Sat	Indicator comparison: which tells what	Build indicator purpose reference card
Sun	Indicator quiz + journal	Pass indicator purpose quiz

Week 7 Deliverables:

- Indicator purpose reference card created
- 20 MA crossover observations
- 15 RSI observations
- Quiz: $\geq 80\%$

WEEK 8 — Candlestick Patterns

- Identify major reversal candles
- Recognize continuation vs reversal patterns
- Understand context dependency
- Avoid pattern-only trading

Day	Topic	Practical Task
Mon	Doji, hammer, shooting star	Identify 20 of each
Tue	Engulfing patterns	Find 15 engulfing setups
Wed	Inside bars / pin bars	Find 15 inside bar setups
Thu	Morning/evening star	Find 10 star formations
Fri	Pattern failure modes	Identify 10 failed patterns

Day	Topic	Practical Task
Sat	Pattern observation marathon	30 pattern observations
Sun	Pattern quiz + phase 1 review	Pass Phase 1 final assessment

Week 8 Deliverables:

- 100 candlestick pattern observations
- Pattern identification quiz: $\geq 85\%$
- Phase 1 Final Assessment passed
- Risk Engine Spreadsheet v1.0 finalized

PHASE 1 GRADUATION CRITERIA

Criterion	Required Threshold
Quiz scores (average across all modules)	$\geq 80\%$
Risk Engine Spreadsheet v1.0	Complete and tested
Chart observation log entries	≥ 80 entries
Trade vocabulary (glossary)	All terms defined in own words
Total study hours logged	≥ 100 hours
Daily journal consistency	14/14 days per week
Self-assessment: market structure	$\geq 7/10$

If you do not meet these criteria, Phase 1 is extended by 1-2 weeks until competency is verified.

PART V — PHASE 2: STRATEGY DEVELOPMENT

(Months 3-4)

Phase Goal: Design, validate, and backtest ONE primary trading strategy. Achieve statistical evidence of positive expectancy through manual backtesting.

Parameter	Specification
Phase Duration	8 weeks
Total Hours	~110 hours
Critical Deliverables	Strategy Rulebook v1.0, Backtest journal (100+ trades), Performance statistics

MONTH 3 — STRATEGY CONSTRUCTION

WEEK 9 — Market Structure Deep Dive

- Master multi-timeframe analysis (Higher TF → Middle TF → Lower TF)
- Understand Break of Structure (BOS)
- Recognize Change of Character (CHoCH/MSS)
- Apply liquidity concepts

Day	Topic	Practical Task
Mon	HH, HL, LH, LL framework	Identify on 10 charts
Tue	Break of Structure (BOS)	Mark 15 BOS events
Wed	CHoCH / MSS reversals	Mark 10 CHoCH events
Thu	Liquidity concepts (BSL, SSL)	Identify liquidity pools on 10 charts
Fri	Multi-TF analysis workflow	Full MTF analysis on 5 pairs
Sat	Chart study: 6 hours	30 market structure observations
Sun	MTF workflow quiz	Pass MTF scenarios

Week 9 Deliverables:

- 30 market structure observations
- MTF analysis examples: 5 pairs × 3 timeframes
- Quiz: ≥ 85%
- Personal MTF workflow documented

WEEK 10 — Strategy Selection & Setup

- Compare candidate strategies
- Select ONE primary strategy (recommended: Trend Pullback v1.0)
- Define all entry criteria
- Define all exit criteria

Day	Topic	Practical Task
Mon	Compare 4 strategies (Pullback, Breakout, Range, Mean Reversion)	Build comparison matrix
Tue	Why Trend Pullback is best for beginners	Document reasoning
Wed	Define entry criteria for selected strategy	Write 5 entry rules

Day	Topic	Practical Task
Thu	Define stop-loss criteria	Write 5 SL rules
Fri	Define take-profit criteria	Write 5 TP rules
Sat	Build strategy rulebook (Draft)	Write complete draft
Sun	Strategy comparison quiz + draft review	Submit draft rulebook

Week 10 Deliverables:

- Strategy comparison matrix (4 strategies)
- Selected: Trend Pullback v1.0 (or alternative if justified)
- Entry/SL/TP rulebook DRAFT

WEEKS 11-12 — Manual Backtesting Program

Backtesting Protocol:

Parameter	Specification
Instrument	Selected major pair (e.g., EUR/USD)
Timeframe	H4 for setup, H1 for entry
Sample period	Minimum 12 months historical data
Trade frequency	Typically 5-15 per month
Minimum sample	100 trades before judgment
Recording medium	Backtest journal (Excel template)
Bias prevention	Strict rule adherence; pre-committed rules

Per-Trade Recording Template:

Field	Description
Date	Trade date
Instrument	e.g., EUR/USD
Direction	Long/Short
Timeframe	e.g., H4
Setup type	Trend pullback, BOS, etc.
Entry price	Exact entry
Stop loss	Exact SL
Take profit	Exact TP
Risk (R)	1R always
Result	Win/Loss/BE
R-multiple	+1.5R, -1R, 0R, etc.
Reason	Why this trade
Rule compliance	Yes/No (if No, explain)
Screenshot	Required
Notes	Lesson, mistake

Weeks 11-12 Deliverables:

- 100+ backtest trades recorded

- Backtest journal complete
- Win rate calculated
- Average R-multiple calculated
- Expectancy calculated

MONTH 4 — STATISTICAL VALIDATION & STRATEGY REFINEMENT

WEEKS 13-14 — Performance Statistics

- Calculate win rate, average win/loss, expectancy
- Understand profit factor and R-multiple distribution
- Recognize strategy-specific failure patterns
- Identify drawdown periods

Statistics to Calculate:

Statistic	Formula	Minimum Sample
Win Rate	$(\text{Wins} / \text{Total Trades}) \times 100$	100 trades
Average Win	Sum of winning R / # wins	100 trades
Average Loss	Sum of losing R / # losses	100 trades
Expectancy	$(\text{Win}\% \times \text{Avg Win}) - (\text{Loss}\% \times \text{Avg Loss})$	100 trades
Profit Factor	Gross Profit / Gross Loss	100 trades
Max Drawdown	Largest peak-to-trough decline	100 trades
Consecutive Losses	Longest losing streak	100 trades
Risk of Ruin	Calculated based on win rate and risk %	Math model

Weeks 13-14 Deliverables:

- Complete statistics computed
- Performance report written
- Equity curve visualization
- Strategy Rulebook v1.1
- Out-of-sample backtest: ≥ 20 trades

PHASE 2 GRADUATION CRITERIA

Criterion	Required Threshold
Total backtest trades (in-sample)	≥ 100 trades
Out-of-sample trades	≥ 20 trades
Strategy compliance (rule-following)	$\geq 95\%$
Expectancy	Positive (> 0) OR clearly understood why negative
Profit Factor	≥ 1.2 (positive but not over-fitted)
Maximum observed drawdown	Within acceptable range for strategy
Strategy Rulebook v1.1	Complete and documented
Personal understanding	Can explain WHY strategy works in own words

If strategy shows negative expectancy in 100+ backtest trades, do NOT proceed. Modify or replace strategy and re-test.

PART VI — PHASE 3: DEMO EXECUTION (Months 5-6)

Phase Goal: Execute the validated strategy on demo account with discipline. Build psychological resilience and execution skills.

Parameter	Specification
Phase Duration	8 weeks minimum
Total Hours	~110 hours
Critical Deliverables	Demo trading journal (30+ trades), performance vs backtest

MONTH 5 — DEMO EXECUTION V1.0

WEEKS 17-18 — Demo Trading Setup & Initial Execution

Setup Requirements:

Item	Specification
Demo account type	Standard Cent (micro lots) or Standard
Demo balance	Match intended live capital (\$800-1,000)
Leverage	Set to 1:30 or 1:50 (conservative)
Strategy	Trend Pullback v1.1 (validated)
Risk per trade	0.5% of demo balance
Maximum trades/day	2-3
Maximum positions open	2
Trading session	Selected based on instrument liquidity

Daily Routine:

Time	Activity
Pre-market (15 min)	News check, calendar review, no-trade list
Market scan (30 min)	Identify setups on watchlist instruments
Setup confirmation (30 min)	Multi-TF analysis, entry criteria check
Trade execution	If A/A+ setup only
Position management (1 hr)	Monitor, no interference unless invalidation
Post-trade review (15 min)	Journal entry, score trade

Weeks 17-18 Deliverables:

- Demo account active with correct settings
- 8-15 demo trades executed
- All trades journaled
- No rule violations

WEEKS 19-20 — Continued Demo Execution

Focus: Build consistency, identify execution gaps vs backtest expectations.

Week 19-20 Deliverables:

- 15-25 additional demo trades

- Win rate vs backtest comparison
- Average R-multiple vs backtest comparison
- Psychological state log

MONTH 6 — DEMO CONSOLIDATION & READINESS ASSESSMENT

WEEKS 21-22 — Demo Continuation

Focus: Psychological conditioning, discipline verification.

Daily Activities:

- Continue demo execution following system
- Daily psychological self-assessment
- Weekly performance comparison to backtest
- Identify any emotional triggers

WEEKS 23-24 — Readiness Assessment & Live Trading Preparation

Pre-Live Requirements:

Requirement	Specification
Minimum demo trades	30+ trades
Demo win rate vs backtest	Within $\pm 15\%$ of backtest
Demo average R vs backtest	Within $\pm 20\%$ of backtest
Rule violations	≤ 1 (with documentation)
Max drawdown experienced	Within strategy expected range
Psychological assessment	Passed
Bangladesh legal consultation	Completed
Financial readiness	Verified (capital is truly risk-able)

Live-Trading Readiness Assessment (Week 24): A formal 100-point assessment across 12 domains. Minimum 80/100 required to proceed to live trading.

PHASE 3 GRADUATION CRITERIA

Criterion	Required Threshold
Total demo trades	≥ 30
Rule compliance	$\geq 95\%$
Strategy execution quality	Within $\pm 15\%$ of backtest performance
Maximum drawdown	Within strategy expected parameters
Psychological readiness	Passed
Live-Trading Readiness Score	$\geq 80/100$
Bangladesh legal/tax consultation	Completed
Financial situation confirmed	Risk capital is truly risk-able

If any criterion is not met, Phase 3 is extended. NO live trading begins until all criteria are satisfied.

PART VII — TRADER COMPETENCY SCORECARD

This scorecard tracks your development across 10 domains. You must score $\geq 80/100$ overall before live trading.

#	Domain	Weight	Month 1	Month 3	Month 6	Final
1	Market Knowledge	10%	—	—	—	—
2	Risk Management	15%	—	—	—	—
3	Broker Mechanics (Exness)	8%	—	—	—	—
4	Position Sizing & Math	10%	—	—	—	—
5	Technical Analysis	10%	—	—	—	—
6	Fundamental Awareness	5%	—	—	—	—
7	Strategy Development	10%	—	—	—	—
8	Statistics & Backtesting	10%	—	—	—	—
9	Trading Psychology	10%	—	—	—	—
10	Discipline & Execution	7%	—	—	—	—
11	Journaling Quality	5%	—	—	—	—
12	Regulatory Awareness	5%	—	—	—	—
	TOTAL	100%	/100	/100	/100	/100

7.1 Domain Definitions

Domain 1: Market Knowledge (10%)

- Forex market structure
- Currency pair types
- Price drivers
- Market participants

Domain 2: Risk Management (15%)

- Position sizing formulas
- Risk per trade calculation
- Maximum loss limits (daily/weekly/monthly)
- Risk of ruin concepts
- Drawdown management

Domain 3: Broker Mechanics — Exness (8%)

- Account types understanding
- Platform navigation
- Order execution
- Margin / leverage mechanics
- Cost structures

Domain 4: Position Sizing & Math (10%)

- Pip value calculations

-
- Lot size calculations
 - Margin requirements
 - R-multiple calculations

Domain 5: Technical Analysis (10%)

- Chart reading
- Candlestick patterns
- Support/resistance
- Trend identification
- Indicator usage

Domain 6: Fundamental Awareness (5%)

- Economic indicators
- Central bank impact
- News event awareness

Domain 7: Strategy Development (10%)

- Setup identification
- Entry/exit rules
- Strategy logic understanding

Domain 8: Statistics & Backtesting (10%)

- Win rate, expectancy
- R-multiple distribution
- Backtest methodology
- Bias prevention

Domain 9: Trading Psychology (10%)

- Emotional control
- FOMO management
- Loss handling
- Confidence calibration

Domain 10: Discipline & Execution (7%)

- Rule following
- No-trade discipline
- Position management discipline

Domain 11: Journaling Quality (5%)

- Trade recording completeness
- Review process

Domain 12: Regulatory Awareness (5%)

- Bangladesh regulations
- Broker regulatory status
- Tax implications

PART VIII — RISK MANAGEMENT FRAMEWORK

Capital Protection System

8.1 Core Position Sizing Formula

Position Size (lots) = Account Risk (\$) ÷ (Stop Loss in Pips × Pip Value per Lot)

Example:

- Account: \$1,000
- Risk: 0.5% = \$5
- Stop Loss: 20 pips
- Pip value (EUR/USD standard lot): \$10

Position Size = \$5 ÷ (20 × \$10) = 0.025 lots (round to 0.02 or 0.03)

8.2 Daily Loss Limit Protocol

Trigger	Action
Daily loss reaches 1%	Stop trading for the day. Review what happened.
Daily loss reaches 2%	Stop trading for 48 hours minimum. Mandatory reset.

8.3 Weekly Loss Limit Protocol

Trigger	Action
Weekly loss reaches 4%	Reduce risk per trade to 0.25% for next 5 trades.
Weekly loss reaches 6%	Pause all trading for 1 week. Mandatory strategy review.

8.4 Monthly Drawdown Protocol

Trigger	Action
Monthly drawdown reaches 8%	Reduce risk to 0.25% per trade.
Monthly drawdown reaches 10%	Stop all trading. Full strategy review required.
Monthly drawdown reaches 15%	Strategy likely broken. Consider replacement.

8.5 Hard Prohibitions

NEVER:

- Use martingale (doubling down on losses)
- Use grid strategies without predefined exit
- Move stop loss farther away to avoid taking a loss
- Increase position size after a losing streak
- Trade during major news events (first 90 days)
- Trade more than 3 times in a single day
- Hold more than 2 simultaneous positions (early stages)
- Risk more than 0.5% per trade in Phase 1-3
- Trade when psychologically compromised (tired, emotional, distracted)
- Trade to "win back" recent losses

PART IX — TRADING SCORECARD (Trade Quality Assessment)

Every trade must be graded before, during, and after.

9.1 Pre-Trade Score (max 100 points)

Category	Max Points	Criteria
Market Condition Favorable	15	Trending/ranging as expected for strategy
Setup Quality (A+)	25	Textbook setup, all criteria met
Risk/Reward	15	$\geq 1:1.5$
Confirmation	15	Multi-TF alignment, confirmation signals
Fundamental Environment	10	No conflicting major news
Volatility Normal	10	Spread normal, no abnormal conditions
Psychological State	10	Calm, focused, no emotional pressure

9.2 Trade Grades

Grade	Score Range	Action
A+	90-100	Take trade at full risk
A	80-89	Take trade at full risk
B	70-79	Reduce risk by 50% or skip
C	60-69	Skip trade
No-Trade	< 60	Do NOT enter

Rule (Foundation Phase): Only A+ and A trades are allowed.

PART X — BANGLADESH-SPECIFIC CONSIDERATIONS

10.1 Regulatory Status Summary

Current factual position (as of 2026-08-19):

1. Forex/CFD trading through offshore brokers exists in a legal grey area in Bangladesh. *Sources: ForexBrokers.com (2026), CompareBroker.io (2026), Bangladeshi legal analyses*
2. The Foreign Exchange Regulation Act (FERA) 1947 restricts capital outflows for speculative purposes. Remitting money from Bangladeshi banks for retail forex trading is potentially a FERA violation.
3. BSEC has issued warnings against offshore brokers and has blacklisted several platforms.
4. Most Bangladeshi traders fund offshore brokers through informal channels: bKash/Nagad, e-wallets, crypto P2P.
5. Exness entity for Bangladesh clients: Likely Exness (SC) Ltd regulated by FSA Seychelles (not CySEC/FCA/ASIC). **No investor compensation applies to your account.**

10.2 Required Pre-Live Actions

Before any live trading, you MUST:

- Consult a Bangladeshi legal professional about FERA implications
- Consult a Bangladeshi tax professional about income reporting obligations
- Verify your funding method legality with your bank/financial institution
- Understand that no domestic recourse exists if broker disputes arise
- Accept full personal responsibility for regulatory compliance

10.3 Funding Method Risk Assessment

Method	Convenience	Risk Level	Notes
Bank wire transfer	Low	High	Likely FERA violation
bKash/Nagad to broker	Medium	Medium-High	Outside formal banking; unclear legality
Cryptocurrency P2P	High	High	Convert BDT to USDT, then transfer
Skrill/Neteller	High	Medium	Verify current availability for Bangladesh
Exness local payment	High	Variable	Confirm current Bangladesh options

PART XI — ASSESSMENT & QUIZ FRAMEWORK

11.1 Module Quizzes

Each major module ends with a quiz. **Passing threshold: 80%**

Module	Quiz Topic	Format	Min Score
1.1	Market Reality	20 MCQ	80%
1.2	Forex Basics	20 calc + 10 MCQ	85%
1.3	Margin & Leverage	15 calc + 10 MCQ	85%

Module	Quiz Topic	Format	Min Score
1.4	Trading Costs	15 calc + 10 MCQ	80%
2.1	Chart Reading	30 identification	80%
2.2	S/R & Trend	25 identification	85%
2.3	Indicators	20 MCQ + 5 calc	80%
2.4	Candlestick Patterns	30 identification	85%
3.1	Market Structure	20 identification	85%
3.2	Strategy Design	5 short answer	80%
4.1	Backtesting	10 scenarios	80%
4.2	Statistics	10 calculation	85%
5.1	Demo Execution	10 reflection	80%
6.1	Final Readiness	100-point assessment	80/100

11.2 Failure Protocol

1. Review the material
2. Identify specific weak areas
3. Re-take quiz after 48 hours
4. Maximum 3 attempts per quiz
5. If 3 failures: pause curriculum, schedule intensive review

PART XII — DAILY, WEEKLY, MONTHLY REVIEW STRUCTURE

12.1 Daily Review (5 minutes)

Question	Answer
Did I follow all rules today?	Y/N
Were there setup opportunities?	List
Did I take only A/A+ trades?	Y/N
Was my psychological state acceptable?	Y/N
What is my daily P/L?	\$
What did I learn today?	1-2 sentences

12.2 Weekly Review (30 minutes, Sunday)

Question	Answer
Total trades this week	Count
Win/loss breakdown	W-L
Total P/L	\$ and R
Rule violations	Count (should be 0)
Strategy performance vs expectation	Compare
Psychological patterns observed	List
Action items for next week	3 items max

12.3 Monthly Review (90 minutes, last Sunday)

Question	Answer
Total trades	Count
Win rate	%
Average R-multiple	Value
Expectancy	Value
Maximum drawdown	%
Total monthly P/L	\$ and %
Strategy compliance	%
Major mistakes	List with consequences
Key lessons	Top 3
Strategy adjustments needed?	Y/N
Goal for next month	Specific targets

12.4 Quarterly Review (3 hours, end of quarter)

Full strategy performance analysis:

- 90-day statistics
- Strategy comparison to benchmark
- Drawdown analysis
- Psychological pattern review
- Capital growth analysis
- Curriculum progression assessment
- Decision: continue / modify / pause / replace strategy

PART XIII — DAILY TRAINING PROGRAM (Operational View)

13.1 Weekday 2-Hour Sessions

Hour 1 — Theory + Observation

Minutes	Activity
0-10	Review previous day's notes
10-40	Read/watch lesson content
40-60	Chart observation on current watchlist

Hour 2 — Practice + Reflection

Minutes	Activity
0-30	Exercise: calculations, quizzes, scenarios
30-50	Risk engine updates (if applicable)
50-60	Journal entry for the day

13.2 Weekend 12-Hour Sessions

Saturday (6 hours): Deep Learning

Hours	Activity
0-2	Heavy theory (advanced topics)
2-4	Chart observation marathon
4-6	Backtesting or advanced exercises

Sunday (6 hours): Practice & Review

Hours	Activity
0-2	Practice exercises + quizzes
2-4	Backtesting (Phase 2) or demo review (Phase 3)
4-5	Weekly review
5-6	Journal updates + next week planning

PART XIV — CAPITAL GROWTH SCENARIOS (Conservative Projections)

Using realistic assumptions: 0.5% risk per trade, 40-50% win rate, 1:1.5 R:R.

14.1 Account Growth Projections (Hypothetical Only)

Starting Capital	Monthly 5% Return	Month 1 Compounded	Annual Compounded
\$100 (BDT 12,000)	~\$5	\$100 → \$105	~\$179
\$250 (BDT 30,000)	~\$12.5	\$250 → \$263	~\$449
\$500 (BDT 60,000)	~\$25	\$500 → \$525	~\$898
\$1,000 (BDT 100,000)	~\$50	\$1,000 → \$1,050	~\$1,795
\$2,500 (BDT 300,000)	~\$125	\$2,500 → \$2,625	~\$4,488
\$5,000 (BDT 600,000)	~\$250	\$5,000 → \$5,250	~\$8,977

14.2 Critical Notes

- These are mathematical projections, not guarantees
- Negative months are normal (expect 2-4 losing months per year)
- Drawdowns of 20-30% within a year are normal even for profitable traders
- Compounding slows dramatically as account grows

A 0.5% risk-per-trade system with positive expectancy is designed to PRESERVE capital first, then grow slowly. Do not expect this to solve financial distress or replace income in Year 1.

PART XV — QUICK REFERENCE RULES

One-Page Risk Rules

1. Risk 0.5% of account per trade (max 1% after proven edge)
2. Daily loss limit: 2% — stop trading if reached
3. Weekly loss limit: 6% — pause if reached
4. Monthly drawdown limit: 10% — full review if reached
5. Maximum 2 open positions (early stages)
6. Position Size = Account Risk ÷ (Stop Loss in Pips × Pip Value)
7. NEVER move stop loss away from entry
8. NEVER add to losing position without predefined plan
9. NEVER trade to recover losses
10. NEVER increase size after losses

One-Page No-Trade Rules

DO NOT TRADE when:

- Major economic news within 30 minutes
- Spread abnormally wide (>3× normal)
- Volatility extreme (recent news shock)
- Market structure unclear

-
- Risk/reward < 1:1.5
 - You're emotional (angry, anxious, desperate)
 - After reaching daily loss limit
 - After reaching weekly loss limit
 - Psychological state compromised
 - Platform/connection unstable
 - Revenge mindset present

One-Page Entry Checklist

- Market regime confirmed for strategy
- Setup is A or A+ quality
- Risk/Reward $\geq 1:1.5$
- Multi-timeframe alignment confirmed
- Stop loss at structural level (not arbitrary)
- Position size calculated using formula
- Maximum loss accepted (mentally + mathematically)
- No major news within 30 minutes
- Spread within normal range
- Psychological state: calm, focused
- Trade graded $\geq 80/100$

PART XVI — APPENDICES

Appendix A — Tools Required

Tool	Purpose	Status
Exness demo account	Practice trading	Required from Week 1
MetaTrader 4 / 5	Trading platform	Required from Week 3
Excel or Google Sheets	Risk engine, journal	Required from Week 3
Calculator	Position sizing verification	Always
Notebook (digital or physical)	Trade journal, notes	Always
Economic calendar (ForexFactory)	News awareness	Required from Week 4
Charting tool (MT5 built-in)	Analysis	Required from Week 5

Appendix B — Recommended Reading (Optional)

Source	Topic	When
"Trading in the Zone" - Mark Douglas	Psychology	Month 1-2
"Japanese Candlestick Charting" - Steve Nison	Patterns	Month 2
Exness Education Portal	Platform mechanics	Throughout
Babypips.com School	Comprehensive forex education	Supplement
TradingwithRayner (YouTube)	Visual learning	Supplement

Appendix C — Glossary (Key Terms)

Term	Meaning
Pip	Smallest standard price move (0.0001 for most pairs)
Lot	Standard trade size (100,000 units = 1 standard lot)
Spread	Difference between bid and ask
Leverage	Borrowed capital multiplier
Margin	Capital required to open a position
Stop Loss	Order to limit loss
Take Profit	Order to lock in profit
Risk/Reward (R:R)	Ratio of potential loss to potential gain
Drawdown	Decline from peak equity
Expectancy	Average expected outcome per trade

Appendix D — Documentation Index

1. Risk Engine Spreadsheet (built in Weeks 3-4, refined throughout)
2. Trading Journal (started Week 1, mandatory throughout)
3. Backtest Journal (started Week 11)

-
4. Performance Dashboard (built Week 13)
 5. Strategy Rulebook (developed Weeks 10-12)
 6. Personal Trading Plan v1.0 (developed Phase 3)

PART XVII — SUCCESS CRITERIA FOR COMPLETING THIS CURRICULUM

You have successfully completed this curriculum when:

- All Phase 1 quizzes passed ($\geq 80\%$)
- Risk Engine Spreadsheet v1.0 complete
- ≥ 100 backtest trades completed
- Strategy Rulebook v1.1 documented
- Strategy shows positive expectancy (or justified alternative)
- ≥ 30 demo trades executed with $\geq 95\%$ rule compliance
- Demo performance within $\pm 15\%$ of backtest expectations
- Trader Competency Score $\geq 80/100$
- Bangladesh legal/tax consultation completed
- Capital verified as truly risk-able
- Live-Trading Readiness Assessment passed
- Personal Trading Plan v1.0 written

PART XVIII — IMPORTANT DISCLAIMERS

- Past backtest performance does NOT guarantee live trading results. Markets evolve. Strategies that worked in past data may fail in future conditions.
- The projections in this document are mathematical illustrations, NOT predictions. Actual returns will vary, possibly significantly, including total loss.
- Bangladesh residents face specific regulatory risks. This document does not constitute legal advice. Consult qualified professionals.
- Trading leveraged products involves substantial risk of loss. You should not risk capital you cannot afford to lose.
- No part of this curriculum constitutes investment advice. You remain solely responsible for your trading decisions.
